MECHANICAL SERVICES

General Machining – Repair or replacement of any shaft, housing or miscellaneous machine part. Machine shop equipment includes a key seater, lathes, knee-mills and boring mills.

ID & OD Grinding – Precision finishing of parts to tolerances of .0002” (build ups with hard chrome plating and/or metalizing available).

Welding Services – Mig, Tig and Stick welding capabilities.

Babbitting – Puddle, static pour or spin cast babbitting.

Fabrication – Light, in house fabrication.

Industrial Repair Service specializes in precision machinery component repair. We can repair or replace virtually any worn or broken component. Your project may range from building a new shaft to chroming, spraying or welding an ID or OD bearing fit. Whatever your need, please consider IRS for your repair needs.
